

Research on the Impact of Living with Invalidation of Fibromyalgia

Would you like to contribute to this research?

The purpose of this research is to understand more about the impact on people with Fibromyalgia, of experiencing their symptoms as invalidated by others, including family, work colleagues, and medical professionals. It is hoped that research like this will help to raise awareness about the impact of a lack of understanding of Fibromyalgia. If you choose to complete the online survey, your participation will be invaluable in contributing towards a better understanding of the extent and impact of illness invalidation experiences on people living with Fibromyalgia. This research has been granted ethical approval by the National University of Ireland Research Ethics Committee. A summary of the study will be made available through your organization in September 2011.

If clicking this link below does not take you directly to the online survey, please copy and paste the link into the address bar of your web browser to access the survey
